Quality assurance strategies and processes Initiated by IQAC

Introduction

In order to maintain academic excellence and promote institutional collaboration, Narangi Anchalik Mahavidyalaya's Internal Quality Assurance Cell (IQAC) is essential. IQAC has greatly raised the academic reputation of the school by implementing a number of programs to support research, multidisciplinary collaboration, and academic networking.

1. Annual Journal Publications

Under the direction of IQAC, the college produces two ISSN-recognized publications to promote scholarly study and discussion:

(a) Shakti "The Strength"

- This journal, which was started by the Women Studies and Research Centre, focuses on socio-cultural topics relating to women's empowerment.
- It has published six volumes since its launch in 2014, offering a forum for scholarly discourse on gender studies.
- Its exposure and legitimacy in research communities are guaranteed by its ISSN: 2395-5007.

(b) "The Vision of Truth" by Dristi

- This publication, which is published by the Department of Philosophy, promotes philosophical debates and investigations.
- Since its debut in 2012, the publication has played a significant role in promoting scholarly discussions in the fields of philosophy and ethics.
- Authenticity and academic recognition are guaranteed by ISSN: 2395-5015.

2. Memorandums of Understanding (MoUs)

Memorandums of Understanding (MoUs) have been facilitated by IQAC with academic institutions and other organizations in order to foster knowledge sharing, academic exchanges, and cooperative research. Among these MoUs are:

1. Dispur College

- The departments of Economics, History, and Assamese work together on seminars,

academic research, and cultural exchange initiatives.

- Noonmati Police Station - Collaborative efforts in criminology studies, community engagement, and legal knowledge.

Effects of These Methods

1. Promotion of Research and Publication: To promote an academic culture inside the institution, faculty and students are strongly encouraged to publish research papers and articles.

- The ISSN-accredited journals offer a venue for the dissemination of high-calibre research.

2. Strengthened Institutional Ties: Memorandums of Understanding with other organizations and institutions offer chances for joint research, faculty training, and student education.

- These collaborations support knowledge sharing and academic networking.

3. Increased Awareness of the Institution

- The institution's standing in the academic and research communities is raised by the publication of research journals and inter-institutional partnerships.
- Journals with ISSN accreditation gain respect in both domestic and foreign academic communities.

4. Encouragement of Interdisciplinary Collaboration: The MoUs support interdisciplinary projects that aid in tackling difficult social and intellectual issues.

- - Working together with outside groups

Conclusion

At Narangi Anchalik Mahavidyalaya, the IQAC-led projects have made a substantial contribution to institutional cooperation, research promotion, and academic advancement. In addition to improving the standard of instruction, these initiatives boost the college's standing in the scholarly and scientific community. By establishing additional partnerships, launching fresh research initiatives, and encouraging innovation in higher education, IQAC hopes to broaden these practices in the future.
